

Dear Hiring Manager,

My name is Brendan Premo. I am a recent graduate from SUNY at Albany with Master's level degrees in Mathematics and Data Science and am interested in this position in data analytics. During my time as a student, I have had numerous projects where I was required to write algorithms by hand, clean large data, preprocess, and train models of all kinds on many types of data. This has fueled a desire to seek a plethora of side projects in data and combinatorics, where I have applied an even higher level of rigor. I am a dedicated professional who is persistent in learning until I have a full understanding of my duties and their outcomes, as I am passionate about seeing the full picture in my work, while knowing when being spirited is reasonable. For these reasons, I feel I am a great fit for this role.

I look forward to talking to you more about my work and this position. Thank you for this opportunity to apply.
