PROFESSIONAL EXPERIENCE

Independent Contractor *Data & Analytics Consultant*
June 2026 – Present *Troy, NY*

- **Chatham Oaks:** Part-time contributor to a production financial reporting application, working in an existing team codebase on the layer that maps imported accounting records into internal reporting categories.
- **Rose Project:** Built a Python program to classify and total drug dosage records for a healthcare client and wrote a guide for reproducing the same analysis in Excel, letting the client rerun and extend the work without writing code.
- **Changelog Systems:** Shipped an MCP server exposing a multi-tenant app's data to agentic LLM clients behind OAuth 2.1 and per-tenant row-level isolation, with batched writes committing all-or-nothing behind a dry-run preview.
- **Elder Owl:** Head of quality assurance on a state-of-the-art AI tool with smart task deliberation between different thinking and context level LLMs.

Soria Analytics *Data Analyst*
June 2025 – May 2026 *Remote*

- Built and maintained the reporting layer for government- and private-equity-sourced healthcare datasets in Sigma, designing or refining 60+ client-facing dashboards that compiled to SQL against a Postgres data warehouse.
- Built end-to-end ingestion pipelines in Python, spanning EMR, EHR, and public health sources, handling acquisition, cleaning, and analysis of MLR, enrollment, and year-over-year deltas for payers and providers in the sector.

SORIA PROJECTS

Star Ratings (Soria Analytics Script, Python) *Fall 2025 – Winter 2025*

- Developed a script that reconciles the annual CMS Star Ratings tables for healthcare contracts, attributing each year-over-year rating change to the specific measures driving it and incorporating enrollment-weighted to best predict shifts in NYSE tickers; shifts correlate 5-10% on the low-end, upwards of 25% in market value on major rating shifts.

Hospital Cost Report (Soria Analytics Dashboard, Sigma) *Winter 2025 – Spring 2026*

- Created an interactive dashboard for the annual CMS Hospital Provider Cost Report dataset, breaking down national and provider-specific metrics (Revenue, Costs, Margins, Occupancy and Discharges) in a single dynamic view.
- Set up a pipeline including a web crawler to automatically detect RSS feed updates for data, a scraper for automatic download, schema detection protocols to find deviations in formatting, and a system to incorporate the newly uploaded data directly into the dashboard, saving hours of manual monitoring and processing time.

CDC Weekly Hospital Inpatient/ICU Occupancy (Soria Analytics Dashboard, Sigma) *Fall 2025*

- Designed a dashboard tracking Influenza-like Illness over time, supporting season-to-season comparison across variable timeframes with optional breakdowns by age group and by region (Census and HHS), backed by a full end-to-end data pipeline that refreshes the dashboard when new data is released.

SEC Filing Extraction (Soria Analytics Script, Python) *Winter 2025 – Spring 2026*

- Created a batch pipeline that locates SEC filings by ticker, quarter, and year, retrieves them, and extracts financial table data into typed schemas that retain the source page for every value.

EDUCATION

University at Albany Albany, NY
Master of Science in Data Science, Master of Arts in Mathematics *Fall 2023 – Spring 2025*
Thesis: Four-Part Lecture Series on the Riemann Hypothesis

- Designed and delivered a four-part lecture series to an audience of graduate students and faculty, pacing each session so attendees outside the specialty could grasp the content and fielding questions of varying levels of experience.

Rensselaer Polytechnic Institute (RPI) Troy, NY
Bachelor of Science in Applied Mathematics *Fall 2016 – Fall 2020*

TECHNICAL SKILLS

- **Languages & Tools:** Python (Pandas, Scikit-Learn, PyTorch), SQL, R, Excel, Jupyter, Git/GitHub, Sigma Computing, LaTeX, Databricks, PowerBI, Claude Code, MCP servers, agentic LLM tooling
- **Modeling:** Regression (Multivariate, Logistic, Time Series), Random Forest, Feature Engineering, Monte Carlo Simulations, Topological Data Analysis (TDA), Pivot Tables, XLOOKUP
